jawaria-portfolio-theta.vercel.app

Summary

Software Engineer with hands-on experience in full-stack, mobile, desktop, game, and AI development. Proficient in JavaScript and the MERN stack (MongoDB, Express.js, React, Node.js), building scalable applications. Developed multiple software systems, AI automation workflows, and machine learning models. Strong in solving complex problems and delivering efficient, real-world solutions with a focus on performance and AI-driven design.

Education

COMSATS University

Bachelor's in Software Engineering

CGPA: 3.67/4.0

Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Database Systems

Lahore, Pakistan

01/2023 – 12/2026

Certifications

Crash Course on Python

Google, Coursera

Skills

Programming: JavaScript, Python, Java, C/C++, C#, Dart

Backend: Node.js, Express.js, REST APIs, Authentication

Machine Learning: PyTorch, NumPy, Pandas, Scikit-learn

Tools: Git, GitHub, Vercel, n8n, Tavily

Frontend: HTML, CSS, React, Tailwind, Bootstrap, Next.js

Databases: MongoDB, SQL, SQLite, Firebase, PostgreSQL

Mobile and Game Development: Flutter, Unity, JavaFX

Soft Skills: Leadership, Adaptability, Debugging, Optimization

Projects

Multi Sense: AI-Based ASD and ADHD Screening System

Final Year Project

Next.js, Python, PyTorch, Scikit-learn, MongoDB

github.com/Jawaria-coder/FYP-MultiSense

Developed an AI-powered platform for preliminary ASD and ADHD screening using facial-image analysis and questionnaires. Built a DeiT3 Vision Transformer achieving **94.76% accuracy**, with machine learning models for risk prediction, uncertainty estimation, and result storage.

AI Opportunity Radar

n8n, Gemini, Tavily, Google Sheets

github.com/Jawaria-coder/AI-opportunity-radar-n8n

Built an n8n workflow that discovers, verifies, validates, deduplicates, and saves relevant opportunities, with Calendar reminders for confirmed deadlines.

Vibe-Guard: Personal Healthcare Assistant

MERN Stack

vibeguard-sigma.vercel.app

Developed a full-stack healthcare platform with symptom analysis, doctor recommendations, chatbot integration, and secure authentication. Implemented an admin dashboard and automated health report generation to improve usability and system management.

Safe Sync: Secure Backup Desktop App

Python, SQLite, AES Encryption

safe-sync-backup-solutions.vercel.app

Built an encrypted backup system using AES encryption with scheduled and manual backups, version control, and secure data management to support data integrity and recovery.

Expenso: Expense Tracking Mobile App

Flutter, Firebase, Firestore

expenso-app.vercel.app

Developed a cross-platform expense tracking application with real-time synchronization, budgeting alerts, Google authentication, and live currency API integration for financial insights.

School Management System

Java, JavaFX

Developed a desktop application using object-oriented programming principles with modules for student records, staff management, library management, and fee tracking.
